To whom it may concern

V&M-ATLS is a contract laboratory operating in George. Most of our clients are based in Gauteng, Cape Town and Durban. A lot of our work is based on liquid chromatography (HPLC) with an array of detectors including UV, fluorescence, MS and MS/MS. As such we require a steady supply of ultrapure water ($18.2 \text{ M}\Omega\cdot\text{cm}^{-1}$). We obtained a water purification system from Neil Margetts of GIC Scientific in 2009. Our system consists of an RO and polisher unit operating directly from George municipal water supply. The system has been running ever since and we have never had a single day of downtime. All consumables are readily available for GIC and are rapidly delivered when required. We have found Mr Margetts knowledgeable and most helpful under all circumstances and can comfortably recommend his services to anyone else.

Please feel free to contact me should you wish to obtain any further information.

Kind Regards
Mauritz

Mauritz Wentzel (Ph.D) Pr. Sci. Nat.
